Description

Yachting Brokers are pleased to present two Mainstay Marine (formerly Mustang Marine) Ribworker coded passenger vessels / workboats. Boat vessels are available for sale as a result of the pending delivery of two new build replacement vessels. The Ribworker's reputation is built on a successful light-weight, high performance and versatile design and the current owners will testify to the success of the design and the vessel's performance. Both vessels are nearly identical in age and specification with just minor differences. Cyclone's helm position is to port, Hurricane's is centred. Cyclone is fitted with trim tabs and the interior seating layout is slightly different on each vessel. The vessels are offered for sale with relevant documentation including heel tests (Cyclone June 2020 and Hurricane March 2021) all LSA and deck gear as detailed on the respective SCV2's (available on request) except for liferafts which are on hire. Please note that the vessels are available for viewing whilst operational and can be released once the new vessels have been commissioned and they are offered for sale for on the understanding that they will not be used for commercial operations in the Isles of Scilly by the new owner or any affiliate of. Consideration will be given to offers for both vessels. Appointments to view can be booked in advance directly with Paul Singer of Yachting Brokers. Please note that our inventory is geographically spread so it is important to book viewings well in advance. Updated March 2024: It is expected that these two Ribworkers can be released from current service in the very near future. As result the asking price has been reduced and offers are invited for both vessels.
